## Education

|   |                                    |
|---|------------------------------------|
| <b>University of Zurich</b> , Physics <ul style="list-style-type: none"><li>Description 1.</li><li>Description 2.</li></ul>                 | Zurich, Switzerland<br>1900 – 1905 |
| <b>Eidgenössische Technische Hochschule</b> , Physics <ul style="list-style-type: none"><li>Description 1.</li><li>Description 2.</li></ul> | Zurich, Switzerland<br>1896 – 1900 |

## Experience

|  |   |
|--|---|
| <b>Institute for Advanced Study, Princeton University</b> , Professor of Theoretical Physics<br>Teaching at Palmer Physical Laboratory (now 302 Frist Campus Center). While not a professor at Princeton, I associated with the physics professors and continued to give lectures on campus. <ul style="list-style-type: none"><li>Relativity</li><li>Description 2.</li></ul> | Princeton University, NJ<br>1933 – 1955<br>22 years |
| <b>California Institute of Technology</b> , Visiting Professor <ul style="list-style-type: none"><li>Description 1.</li><li>Description 2.</li></ul>   | Pasadena, California, US<br>1933 – 1933<br>1 year   |
| <b>Kaiser Wilhelm Institute for Physics</b> , Director   | Berlin, Germany<br>1917 – 1933<br>16 years          |
| <b>Karl-Ferdinand University</b> , Professor of Theoretical Physics  | Prague, Czechoslovakia<br>1911 – 1917<br>6 years    |
| <b>University of Zurich</b> , Associate Professor of Theoretical Physics   | Zurich, Switzerland<br>1909 – 1911<br>2 years       |

## Volunteer

|  |   |
|--|---|
| <b>People's Climate March</b> , Lead Organizer<br>Lead organizer for the New York City branch of the People's Climate March, the largest climate march in history. <ul style="list-style-type: none"><li>Awarded 'Climate Hero' award by Greenpeace for my efforts organizing the march.</li><li>Men of the year 2014 by Time magazine</li></ul> | Zurich, Switzerland<br>Apr 2014 – July 2015 |
|--|---|

## Awards

|  |          |
|--|----------|
| <b>Nobel Prize in Physics</b><br>The Nobel Prizes are five separate prizes that, according to Alfred Nobel's will of 1895, are awarded to 'those who, during the preceding year, have conferred the greatest benefit to humankind.'<br>Royal Swedish Academy of Sciences<br><a href="http://www.nobelprize.org/prizes/physics/1921/einstein/biographical">www.nobelprize.org/prizes/physics/1921/einstein/biographical</a> | Nov 1921 |
| <b>Max Planck Medal</b><br>Awarded for outstanding scientific achievement<br>German Physical Society   | 2029     |

## Publications

---

### Zur Elektrodynamik bewegter Körper

It concerned an interpretation of the Michelson–Morley experiment and the properties of light and time. Special relativity incorporates the principle that the speed of light is the same for all inertial observers regardless of the state of motion of the source.

Albert Einstein

### Über einen die Erzeugung und Verwandlung des Lichtes betreffenden heuristischen Gesichtspunkt

In the second paper, he applied the quantum theory to light to explain the photoelectric effect. In particular, he used the idea of light quanta (photons) to explain experimental results, but stressed the importance of the experimental results. The importance of his work on the photoelectric effect earned him the Nobel Prize in Physics in 1921.

### Die Grundlage der allgemeinen Relativitätstheorie

The publication of the theory of general relativity made him internationally famous. He was professor of physics at the universities of Zurich (1909–1911) and Prague (1911–1912), before he returned to ETH Zurich (1912–1914).

|-------------------|---------------------|

Quantum computing is the use of quantum-mechanical phenomena such as superposition and entanglement to perform computation. Computers that perform quantum computations are known as quantum computers.

- Quantum Teleportation
- Quantum Cryptography
